

ETC5512: Week 1 Unit Info

Table of contents

Open data: definitions, sources and examples 1

Open data: definitions, sources and examples

Mon 2 Mar 26 - Sun 8 Mar 26

Welcome to Wild Caught Data!!!

Seminar:

In our first seminar I'll explain what wild caught data is and introduce you to open data.

We will also go through the administrative details for the ETC5512.

Seminar Details:

Time & Location details are available under the Unit Information Tab on Moodle.

This seminar is in person, but a recording will be made available online following the lecture.

Tutorial:

You'll be looking at an example of open data and be using R for the first time.

This will include learning how to read in data in R.

Before your tutorial:

Please install both R and RStudio. If you have any difficulties installing R or RStudio, you can use this resource.

Workshop:

This weeks workshop, I will demo how I use R and show you how to load data. Time: Tuesday 9 - 10 am

Location: Online (see unit details for zoom link).

Help:

If you have questions remember you can use the discussion forum or email ETC5512.Clayton-x
[at] monash [dot] edu

I'm looking forward to meeting you all,

Kate
