ETC5512: Quarto Basics

Table of contents

The workshop was a live demo providing an introduction to Quarto. Refer to the recording.

> **i** Topics covered include:
>
> - Using the assignment template (.zip, .Proj, .qmd)
> - What is a Quarto file
> - Difference between source versus visual editor
> - How to render your .qmd file
> - Setting up your `yaml` header
> - How to write code and text together
> - Setting up a code chunk
> - Setting code chunk options (globally and locally)
> - Naming your code chunks
> - Tips for debugging your Quarto file
> - How to specify different rendering outputs
> - Markdown basics

This demo should have provided a practical extension to the startR module on Quarto basics.

For more support refer to the Quarto Website. You'll find there a link to Quarto basics.
